## ▼ 2048 slide puzzle game "Pretty Girls 2048 Strike"

The "Pretty Girls" series now includes "2048" slide puzzle!

This is a strategic "2048" number game where you combine number blocks to create larger number blocks and defeat your enemies by hitting them with those blocks.

## ▼Two game modes are available!

### - Stage Mode

There are 10 stages for each of the five Demon Tribes.  
Defeat the Demons while damaging enemy blocks!  
The difficulty level increases with each additional stage.  
You can earn points by clearing each stage.  
Use the points you earn to get new costumes and characters from the point exchange in the dressing room!

### - Endless Mode

In this game mode, endless blocks appear and players compete to see how much damage they can inflict on enemy blocks before the blocks can no longer be moved.  
There are 3 stages: 3x3, 4x4 and 5x5 squares.

▼A total of 10 characters of the Exorcist Swordsmen and the Demon Tribes appear in the game!

New costumes can be changed in the dressing room.

All characters are voiced in Japanese.

## ▼ Create your own snapshots in the dressing room!

In Diorama mode, you can place multiple characters at the same time, change the placement of each character, their expressions and costumes, and save/load the scenes you have created.

Stamps, such as hearts, have been added to the stamps to decorate your scenes.

Create your ideal scene and make snapshots!

# How to play

## ▼ Basic rules

Blocks can be slid up, down, left, or right.

When you slide, all blocks move in that direction.

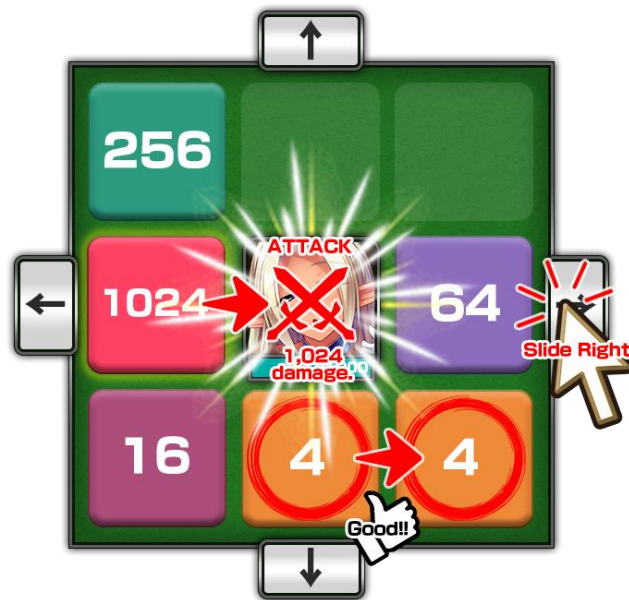

When blocks with the same number collide with each other after moving, they become one block, and the total number of blocks is the sum of the numbers.

If the colliding block is an enemy block, it will be damaged by the number of the block.

After the slide, a new number block is generated.

The game is over when the board is all filled and the slide can no longer be performed.

※In the stage mode, if you fail to perform a specific number of attacks within a certain number of turns, you will take damage. If you take a certain amount of damage, the game is over.

## ▼Character Skills

Different skills are available depending on the selected character.  
When you slide, the skill gauge rises and can be used when it reaches 100%.

### **Sara**

Repositions all blocks on the board to a random position.  
※The placement position of immovable blocks, such as wall blocks, will not change.

### **Chikage**

Inflict damage equal to the largest numbered block on the board.

### **Hotaru**

Merge random blocks of the same number on the board into one block.  
※If the same number block does not exist, it will fail.

### **Kasumi**

Sort blocks in ascending order.

## ▼Block Types

### Number blocks

Damage is inflicted by hitting enemy blocks.  
If the same number of blocks collide with each other, they are summed into a single number block.

### Wall block

These are blocks that cannot be slid.  
If a number block or enemy block collides with it, it will stop there.

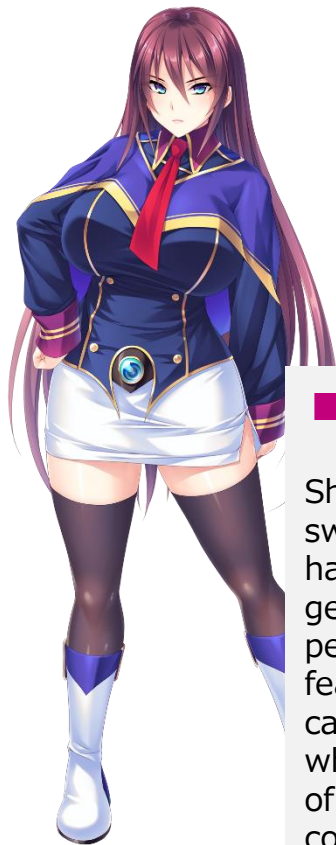

### Enemy blocks

You can slide it like a number block.  
The goal is to break this block.

### Restricted block

This is a block that cannot be slid.  
By sliding a certain number of times, the number will decrease and disappear when it reaches 0.
